

With over 70 years' experience in the service of gas detection systems, Teledyne GMI has industry specialists on hand committed to providing exceptional customer service and support throughout the UK. Calibration and maintenance needs can be tailored to specifically meet the most demanding requirements.

Why choose US?

Network in UK

From our site in Renfrew our expert engineers are conveniently spread across the UK giving you an assigned engineer for consistency and site familiarity. Also our team have the ability to react to the need for 2 men attendance for larger or more safety critical sites.

Highly qualified technicians

Teledyne GMI engineers are fully trained and conversant with multiple gas detection manufacturers systems. We are Safecontractor Approved, carry CCNSG safety passports, and are members of CoGDEM.

Our engineers are your first line of response for any issues or questions you may have around your fixed gas detection systems.

Our After-Sales Service

Our available maintenance contracts

ESSENTIAL contract

- ✓ Includes travel and labour
- ✓ Lasting from **1 to 3 years**, without tacit renewal
- ✓ Package benefit:
 - Multiple visits per year depending on your specific requirements
 - All service visits are scheduled by us
 - The delivery of a service report detailing maintenance operations carried out, calibration data recorded and recommended spare parts.

PREVENTION contract

As per Essential Contract Plus :

- ✓ Replacing consumables (Gas sensors/ batteries, etc.) without additional quotations, orders and repeat visits, ensuring all faults are kept to an absolute minimum.
- ✓ **This gives a fixed and controlled** cost throughout the contract period.
- ✓ **15% discount** on any non-consumable items such as PCBs that may need replacing over the contract period.
