Fixed Gas Detectors Product Availability & Support

TELEDYNE OLDHAM SIMTRONICS is committed to the development of new products to comply with new standards and to meet ever-evolving customers' needs in fixed gas detection instruments. As such, we must periodically streamline our product offerings to continue to provide services of the highest quality and to remain competitive. An interruption in supply of critical components needed for the manufacture of a product could lead to its discontinuation.

Our product obsolescence policy regarding our fixed product range is as follows:

- Announcement of Discontinuation to our entire sales and distribution network at least one year from effective date of discontinuation.
- Parts availability for 8 years from effective date of discontinuation and subject to availability of components.

In addition, during the design phase of new products intended for replacement of existing products, we focus special attention on the maintenance of products in the field and consider the compatibility between new and existing devices.

Please see on the following page for a list of products which will be discontinued. We have also attached a summary of the products which have been previously discontinued and are close to obsolescence.

For more information on these products or their replacements, please contact your sales representative or email us at gasandflamedetection@teledyne.com.

Sincerely,

François AMPE
Product Line Manager, OLDHAM SIMTROIINCS

FIXED GAS DETECTION SYSTEMS PRODUCT AVAILABILITY & SUPPORT SUMMARY

Products	Date of Discontinuation	Date of Obsolescence (Service/Repair and all replacement parts available until this date ¹)	Replacement Products
CEX 800	<2000	dec-2011	OLC 100
CTX 50	<2000	dec-2011	OLCT 10(N)/CTX 300
CTX 100	<2000	dec-2011	CTX 300
Surveyor 5	<2000	dec-2004	MX 15
MX 41	<2000	dec-2004	MX 43
MX 31	april-2000	oct-2007	MX 32
WorksAlones (Gen. I)	<2001	dec-2009	OLCT- iTrans
