

## Product Discontinuation Notice

### Mixed-Gas GT Calibration Station & GT Calibration Station with PC Controller

#### Overview

The purpose of this document is to advise that from 1<sup>st</sup> July 2021, Teledyne Gas Measurement Instruments Ltd. (Teledyne GMI) will discontinue production of the following:

- **Mixed-Gas GT Calibration Station**
- **GT Calibration Station with PC controller.**

#### Details

The **Mixed-Gas GT Calibration Stations** were first introduced in 2006 to support calibration of the GT Series gas detectors and were introduced to compliment the individual-gas calibration stations.

However, with the recent introduction of the improved GT Series instrument (black / blue colours), some functions of the Mixed-Gas Calibration Station have become incompatible. Consequently, it has been decided to discontinue the manufacture of these products.

Note that these stations are still fully compatible with the pre-enhanced version of the GT instrument (yellow / blue colours).

#### Part numbers affected

67102	GT Calibration Station (Mixed Gas) – 6mm inlet nozzles
67102Q	GT Calibration Station (Mixed Gas) – ¼" inlet nozzles
67621	GT Calibration Station with PC controller (Mixed Gas) – 6mm inlet nozzles
67621Q	GT Calibration Station with PC controller (Mixed Gas) – ¼" inlet nozzles
67611	GT Calibration Station with PC controller (Individual Gas) – 6mm inlet nozzles
67611Q	GT Calibration Station with PC controller (Individual Gas) – ¼" inlet nozzles

#### Recommended replacement product

There are no direct replacements for **Mixed-Gas Calibration Stations or for Calibration Stations with PC Controller**. However, the **Individual-Gas** version of the calibration station is the recommended alternative and, with additional accessories, will provide equivalent performance:

67109	GT Calibration Station (Individual Gas) – 6mm inlet nozzles
67109Q	GT Calibration Station (Individual Gas) – ¼" inlet nozzles

Additional equipment required when substituting for **Mixed Gas GT Calibration Station**:

- Gas cylinder with flammable PPM (fitted with appropriate gas regulator)

Additional equipment required when substituting for **PC Controller GT Calibration Station**:

- Windows based PC with USB connectivity
- Gas cylinder with flammable PPM (fitted with appropriate gas regulator)

#### Support and maintenance

Teledyne GMI will continue to provide customer support and repair services for the affected products. Discontinuation of these services will be communicated in a future Service Bulletin.

#### Contact

Should you have any queries regarding this notification, contact Teledyne GMI Technical Support team:
