

The Protégé ZM Single Gas Monitor is an easy-to-use, zero-maintenance gas detection solution that delivers high performance in a small package. The product is available in oxygen, carbon monoxide and hydrogen sulfide models and once activated, will operate maintenance-free for two years.

Features & Benefits

- Designed to provide two years of maintenance-free gas detection without charging or calibration
- Available in Oxygen (O₂), Hydrogen Sulfide (H₂S) and Carbon Monoxide (CO) versions
- On-board data logging capabilities record up to 25 events
- One-button activation, adjustable alarm settings and an easy-to-read display make the unit simple to use
- Small and lightweight, less than three oz, so it is easy to wear
- Three point alarm (audible, visual and tactile) provide clear warnings to the user
- Multiple LCD display options including real-time gas readings, monitor life remaining, or both
- Hibernate mode on the CO and H₂S models provides up to one year additional battery life

Applications

- Petrochemical, Oil & Gas
- Wastewater Treatment
- General Industry/Chemical
- Food and Beverage
- Steel
- Utilities/ Public Works

Approvals

- CSA
- UL
- INMETRO
- EAC
- IECEx
- ATEX
